

Official Corporate Stamp / Cachet — Design Family

Corporate Visual Identity System · Phase 2 — complete review document (preview → PDF)

Branch	brand/corporate-stamp
Base	main 59fbd8f (production untouched)
Prepared	2026-09-18
Rendered build	9571478 — company name SARL FEL DRONE, Lexend 700 gras
Status	DRAFT — HUMAN REVIEW REQUIRED

COMPANY IDENTITY (single source: src/data/company.ts + company-provided data)

Company name	SARL FEL DRONE (legal) · FEL DRONE (short)
Forme	SARL
Capital social	1 000 000 DA
RC	36/00-0683602B26
NIF	0236068360293
NIS	À COMPLÉTER — DATA REQUIRED FROM COMPANY
AI	À COMPLÉTER — DATA REQUIRED FROM COMPANY
Siège social	150 Logements, Commune d'Aïn El Assel, Wilaya d'El Tarf — 36010 Algérie
Téléphone fixe / mobile	044436684 · 0661613399
E-mail / site	contact.feldrone@gmail.com · feldrone.dz

06	Document Simulation	visual simulation only
07	Manufacturing Constraints	for the cutter / stamp maker
08	Invoice Template — Reference (FACTURE)	cachet & signature zone

01 Approved Logo — unchanged source V12 “C2 STADIUM-D”

Symbol — V12 C2 STADIUM-D

160×160, 2u grid, D-plate whose structure is the F, r14 rotor pod. The approved final mark (docs/BRAND.md, human-approved). Rendered here in vector with fill-rule:evenodd — the exact rule of the approved website rendering (src/components/Logo.tsx), which preserves the C2 counters (the F structure) as negative space.

Horizontal lockup — 1157×176

Mark + Lexend 700 wordmark. Production rendering: src/components/Logo.tsx from generated data (src/brand/brandmark.ts).

Mono build

One flat ink, no strokes, gradients or effects — the material language of a stamp. All three concepts embed the approved mark unchanged (extracted from brandmark.ts by the generator — never redrawn).

INTEGRITY

The mark path in every stamp SVG is byte-identical to the production BRAND.mark (extracted by scripts/identity-stamp.mjs at generation time; the production asset remains gated by npm run brand:check). No redesign, no reinterpretation, no new geometry added to the mark.

Rendered with fill-rule:evenodd — exactly the rule the approved website rendering uses (src/components/Logo.tsx) — which is what preserves the C2 counters (the F structure) as negative space in the stamp reproduction.

02 Legal-Information Analysis — Algeria

read-only research · 2026-09-18

Headline finding [VERIFIED]: no Algerian legal text prescribes the content of a physical company stamp (tampon / cachet). The obligation to carry company-identification mentions attaches to the document (the invoice), not to the stamp. The stamp is professional practice: Algerian business usage treats it as the expected authentication element on invoices and letters, and administrative procedures (e.g. the NIF/NIS dossiers) ask for the “cachet de l’entreprise”.

Consequently, no field below is legally mandatory on the physical stamp itself — the classes A/B/C reflect (A) legally established identifiers on documents, (B) professional stamp practice, (C) brand value-add.

Authoritative sources checked

Source	Establishes
[LEGAL SOURCE] Décret exécutif n° 05-468 du 10 décembre 2005 (JO N°80 du 11/12/2005) — commerce.gov.dz/fr/reglementation/decret-executif-n05-468	Mentions obligatoires sur la facture, le bon de livraison et la facture récapitulative — vendeur : raison sociale, adresse, NIF, NIS, RC, AI, n° de facture, date, client, désignation, HT/TVA/TTC. (Secondary interpretation: the devis carries the same mentions.)
[LEGAL SOURCE] CNRC / Sidjilcom — sidjilcom.cnrc.dz	Registre de commerce = official commercial registration (legal existence of the company). The extract records dénomination, forme juridique, adresse, capital, activité, gérance.
[LEGAL SOURCE] DGI (Ministère des Finances) — mf.gov.dz / nifenligne.mf.gov.dz	NIF = tax identification number (15/20 digits), issued by DGI, mandatory on invoices and fiscal declarations.
[LEGAL SOURCE] ONS (Office National des Statistiques)	NIS = statistical identification number, issued after NIF, mandatory on invoices for legal entities.
Algerian professional practice (e-invoicing platforms, company-formation guides)	Physical/digital company stamp (“cachet”) is the standard authentication element on invoices & letters; “une facture sans cachet ne passe pas”. Practice — not a legal text.

Field classification (values verified in repo src/data/company.ts — single source of company identity)

Field	Verified value	Class	Basis
Company name	SARL FEL DRONE (legal name) · FEL DRONE (short) · Concept A top arc renders SARL FEL DRONE in gras/bold (Lexend 700 — company clarification 2026-09-18: “gras” = bold weight, not text content; B/C keep FEL DRONE)	B — Recommended	Legally required on the invoice (D.E. 05-468) [LEGAL SOURCE]; on the stamp: professional practice. Concept A shows the real company name in bold — no abbreviation or substitute text.
RC	36/00-0683602B26 (character-for-character, as issued)	B — Recommended	Primary legal identifier (CNRC); mandatory on the invoice [LEGAL SOURCE]; on the stamp: practice.
Address	Cité 150 Logements B, Aïn El Assel, El Tarf (repo) — headquarters form approved by the company 2026-09-18: 150 LOGEMENTS, COMMUNE D'AÏN EL ASSEL, WILAYA D'EL TARF حي مسكن، بلدية عين العسل، ولاية الطارف	B — Recommended	Required on the invoice [LEGAL SOURCE]; on the stamp: practice. Concept A arc form (review correction 2026-09-18): outer arc 150 LOGEMENTS, COMMUNE AÏN EL ASSEL · inner arc RC ... · WILAYA D'EL TARF. The district is typeset as “150 Logements” — no additional address information.
NIF	— not in repo — Data required	Data required	Legally required on invoices [LEGAL SOURCE]. Stamp slot reserved (Concept A “rsvd” variants). Must be provided by the company — never fabricated.
NIS	— not in repo — Data required	Data required	As NIF (ONS). Stamp slot reserved. DATA REQUIRED FROM COMPANY.
AI (article d'imposition)	— not in repo — Data required	Data required	Optional on stamp. Invoice mention (local tax office). Not needed on the stamp; only if the company wants it.
Phone	+213 6 61 61 33 99	C — Optional	Verified in repo. Excluded from the stamp by design (legibility at 30–45 mm).
Email / website	contact.feldrone@gmail.com · feldrone.dz	C — Optional	Verified in repo. Excluded from the stamp by design.
Capital	1 000 000 DA (repo: “internal record only”)	C — Optional	Verified but flagged internal-only in company.ts. Not placed on the stamp by default — human decision if it should appear.
Arabic company name	— not verified — Data required	Data required	The site's Arabic UI uses the Latin name “FEL DRONE” inside Arabic copy. No verified Arabic denomination exists in the repo — not invented. A bilingual variant can be cut once the verified Arabic name is provided (top-arc slot geometry is ready).

Language decision (for review)

Primary: French. All verified legal identifiers are French-form (RC, SARL, French address); the company's documents and invoice mentions are French per the regulatory regime.

Arabic: official language of Algeria — a bilingual stamp is professionally justified, but the verified Arabic company name is not in the repo:

الاسم العربي للشركة غير متوفر في المشروع

Transliterating it would be fabrication. The concepts therefore ship French; the top-arc geometry of Concepts A/B accepts the Arabic name as a drop-in replacement (same arc, RTL set) once provided. Full duplication of every field in two languages was rejected: it halves the legible text budget and is not required by any source found.

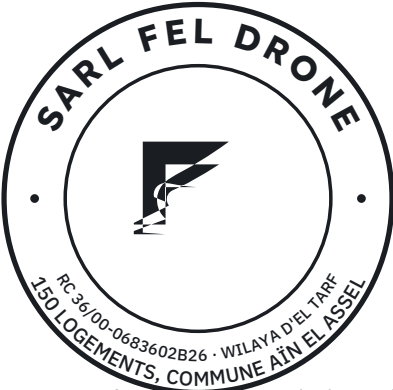

03 Stamp Concepts — rendered

3 concepts · DRAFT

Concept A — Classic Corporate

Intended use: invoices, official letters, administrative dossiers · Recommended size: 45 mm

A1 — manufacturing master. Black on white. Double ring (0.6 / 0.4 mm), company name SARL FEL DRONE (Lexend 700, gras/bold — company clarification 2026-09-18) on the top arc, address — district + commune — on the outer bottom arc, RC + wilaya on the inner bottom arc (IBM Plex Sans), separator dots, approved mark centred (final scale 0.93, review 2026-09-18).

Concept A — reserved NIF / NIS slot

Same geometry, capacity demonstrated · Dotted placeholders are not values

A2 — when NIF & NIS are provided (DATA REQUIRED FROM COMPANY), the two dotted lines are cut as real values without any geometry change. This is the recommended final content structure for invoice use.

Concept B — Modern Corporate

Intended use: quotes, reports, commercial correspondence · Recommended size: 50 mm

B1 — manufacturing master. Single ring (0.5 mm), short name with wide tracking, RC on the bottom arc, larger mark, city line under the mark. More air, no secondary ring — contemporary but administratively credible.

Concept C — Compact Official

Intended use: daily documents, small forms, frequent use · Recommended size: 30 mm

C1 — manufacturing master. Single ring (0.5 mm), name + RC only, mark 6.8 mm. Every stroke stays ≥ 0.5 mm at 30 mm. Address excluded — below the legible minimum at this size.

No concept is legally approved or final. “Draft — human review required” until explicitly approved. The manufacturing master is monochrome black for all concepts (ink stamp); navy exists for presentation only.

Per-concept review sheet

A — Classic Corporate

Structure	Company name SARL FEL DRONE (top, Lexend 700, gras/bold) · address district + commune (bottom arc 1) · RC + wilaya (bottom arc 2) · dots · mark. Reserved: NIF/NIS lines under mark.
Size	45 mm master (also cut at 40/50 mm).
Typography	Name in Lexend 700 (approved FEL DRONE wordmark face, cap 2.8 mm). Legal lines in IBM Plex Sans 500 — address 1.5 mm, RC-wilaya 1.2 mm.
Manufacturing	Rings 0.6/0.4 mm · name cap 2.8 mm · address 1.5 mm · RC-wilaya 1.2 mm · dots $\varnothing 1.0$ mm · mark 12.6 mm ink, scale 0.93 (fill-rule:evenodd). Mono black.
Advantages	Most complete identification; reads as an established Algerian company stamp; reserved NIF/NIS slot = no re-cut when data arrives.
Risks	RC-wilaya arc at 1.2 mm cap is the finest text — at 30 mm it is below the minimum (hence 45 mm recommended); do not scale A below 40 mm.
Status	Draft — human review required

B — Modern Corporate

Structure	Short name (top, Lexend 700) · RC (bottom) · city line under mark.
Size	50 mm master (also cut at 45 mm).
Typography	Name in Lexend 700 (approved wordmark face, cap 4.0 mm, wide tracking). RC + city in IBM Plex Sans (2.2 / 1.6 mm).
Manufacturing	Ring 0.5 mm · name cap 4.0 mm · RC 2.2 mm · city 1.6 mm · mark 13.6 mm ink, scale 1.00 (fill-rule:evenodd). Mono black.
Advantages	Cleanest at a distance; largest mark of the family; strong on modern document layouts (reports, quotes).
Risks	Carries less identification data than A — address absent; if the counterparty expects address on the stamp, choose A.
Status	Draft — human review required

C — Compact Official

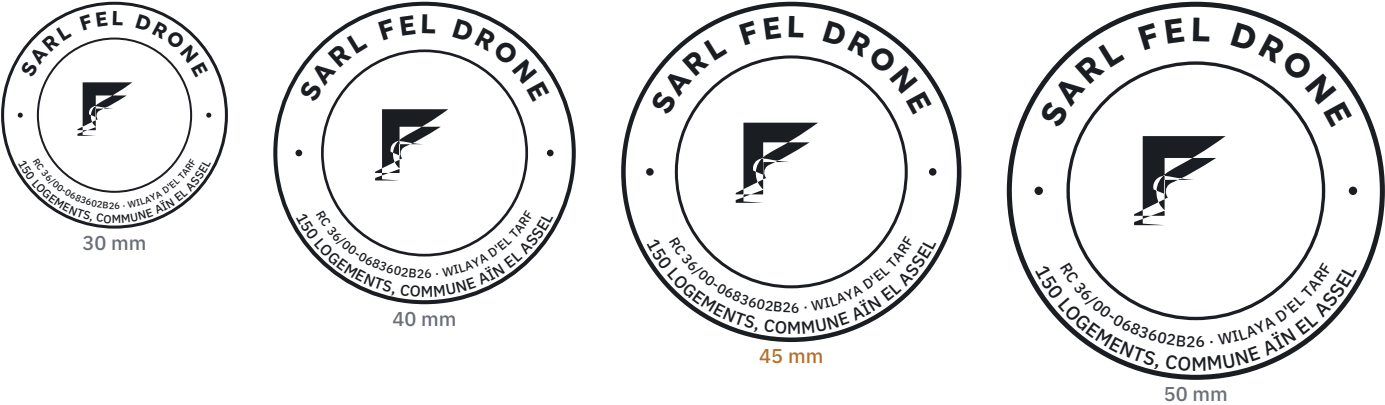

Structure	Short name (top, Lexend 700) · RC (bottom) · mark only.
Size	30 mm master (up to 40 mm max).
Typography	Name in Lexend 700 (approved wordmark face, cap 2.6 mm). RC in IBM Plex Sans (1.6 mm).
Manufacturing	Ring 0.5 mm · name cap 2.6 mm · RC 1.6 mm · mark 6.8 mm ink, scale 0.50 (fill-rule:evenodd). All strokes ≥ 0.5 mm at 30 mm.
Advantages	Best for frequent stamping and narrow document margins; cheapest to produce; survives photocopy at 30 mm.
Risks	Least information — fine for internal/quick use, not the primary invoice stamp if A/B is chosen for that role.
Status	Draft — human review required

04 Physical-Size Simulation

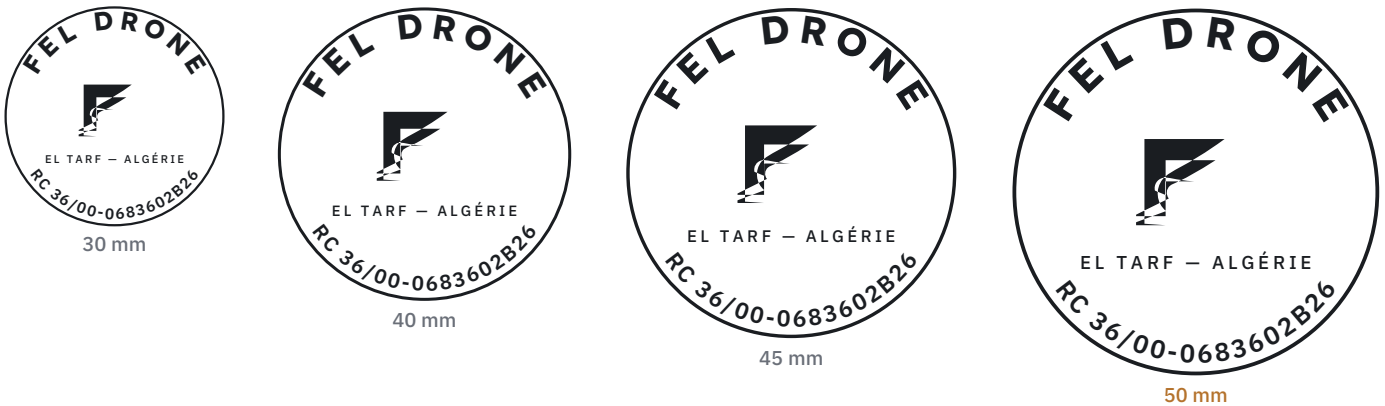

true scale · CSS mm

Rendered at true physical size (1 unit = 1 mm). Each concept at 30 / 40 / 45 / 50 mm. Note where text begins to compress: A's address arc is the first element to fall below a comfortable minimum at 30 mm.

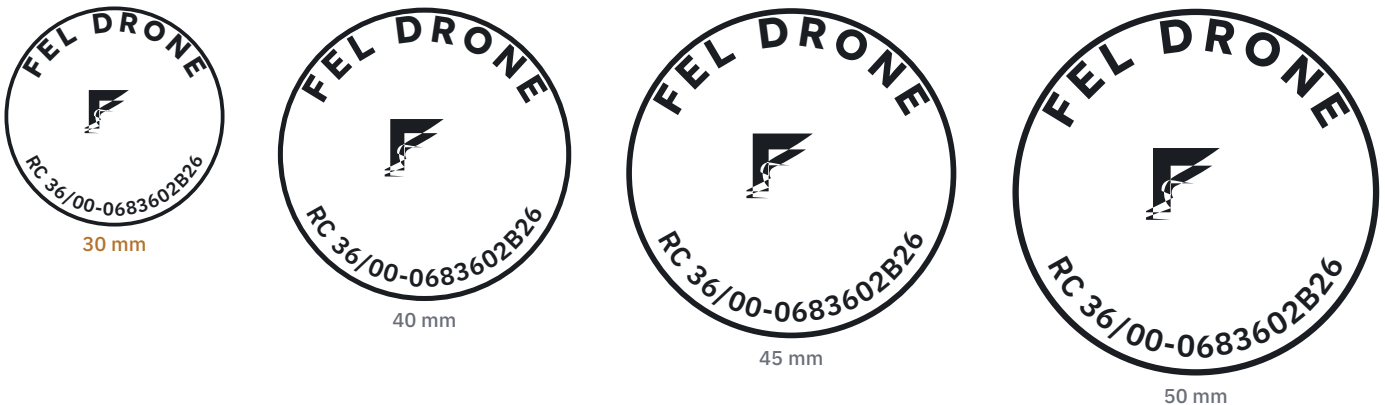

Concept A — Classic (master 45 mm)

Concept B — Modern (master 50 mm)

Concept C — Compact (master 30 mm)

05 Ink Simulation black master · navy presentation

5.1 — Digital master.

Solid black #000 on white. This is what the stamp maker receives. No gradients, no effects.

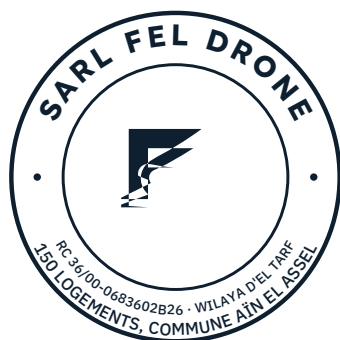

5.2 — Inked impression (simulated).

Subtle displacement + 93 % ink coverage simulating rubber-stamp spread on paper. Expect real impressions to vary ± 10 % in density — the geometry was kept above 0.4 mm so legibility survives.

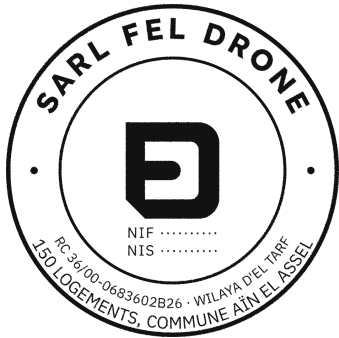

5.3 — Navy presentation (brand ink #0e1f30).

For identity documents and brand collateral only. The physical stamp remains monochrome black (standard ink pad; navy pads fade unevenly).

5.4 — A2 inked (with NIF/NIS slot).

Placeholder state, simulated impression.

5.5 — B inked.

Simulated impression, 50 mm.

06 Document Simulation

visual simulation only

Visual simulations only. The documents below are mock layouts for review. They are not legally approved documents, carry no real client data, and no value or legal force. Grey bars stand in for body copy.

07 Manufacturing Constraints

for the cutter / stamp maker

Constraint	Value
Master files	public/brand-review/stamp/assets/*.svg (vector, mono black, 10 viewBox units = 1 mm). Regenerate with node scripts/identity-stamp.mjs. MANIFEST.json carries SHA-256 of every file.
Minimum stroke	≥ 0.4 mm (Concepts A/B/C all comply; C is designed at 30 mm so its 0.5 mm ring holds).
Typography	Company name/wordmark in Lexend 700 (the approved FEL DRONE wordmark face — never IBM Plex for the name). Legal/data lines (address, RC, wilaya, city) in IBM Plex Sans, the approved body face.
Minimum text	Cap height ≥ 1.2 mm (A's RC-wilaya line — only at 45 mm); name/address lines 1.5–4.0 mm. Never below 1.2 mm for any cut size.
Letter spacing	Baked into the vector (0.05–1.0 mm equivalent per concept); the cutter sets text as outlines, no kerning at cut time.
Negative space	Clearest gap in the family: A's ring-to-text ≥ 2 mm at 45 mm; no detail denser than the mark's own r12 counter.
Ink spread	Simulated at ~0.15 mm (section 05). Keep ring ≥ 0.4 mm so a 0.2 mm spread never closes the ring-to-text gap.
Photocopy / scan	All concepts use solid ≥ 0.4 mm ink at 100 % density → survive A4 photocopy and scanning at 300 dpi (verified by geometry: no element < 0.4 mm).
Reproduction	Black mono only for the physical stamp. Navy variant = presentation. No gradients, no shadows, no hairlines — by construction.
Material	Suggested (not specified): self-inking round stamp (45/50 mm) for office use; classic rubber + acrylic handle for the 30 mm daily stamp.

Not touched: production website, routes, content, API, security, Vercel, GHA, main branch, existing brand assets — this phase adds isolated review files only (scripts/identity-stamp.mjs, public/brand-review/stamp/..., one dev-only Vite middleware). Not part of production navigation.

Review protocol: inspect 01–07 → choose the direction (A / B / C / combination / redirect) → provide the DATA REQUIRED FROM COMPANY (NIF, NIS, optionally AI, Arabic name, decision on capital) → only then does the stamp become final. Nothing here is legally approved or final. PR is the review boundary — not merged.

08 Invoice Template — Reference (FACTURE) cachet & signature zone

The Phase 2 review also delivers a French invoice template (FACTURE) at /brand-review/invoice/ — real A4 layout, D.E. 05-468 mentions, seller data with controlled « À COMPLÉTER » blanks (NIS, AI), TVA rate left selectable (no hardcoded rate), and a « Cachet et signature du vendeur » zone that references the Concept A stamp as visual reference. Export: public/brand-review/invoice/exports/FEL-DRONE-Facture-Template.pdf. The rendered reference below is the validated PDF page; the stamp it references is Concept A (corrected name: SARL FEL DRONE, Lexend 700 gras).
